Contents

SiGe SUPERLATTICES

Si–Ge strained layer superlattices 1
G. Abstreiter (Garching, F.R.G.)

Optical properties of strained Ge–Si superlattices grown on (001)Ge 9
T. P. Pearsall, R. Hull, J. C. Bean and J. M. Bonar (Murray Hill, NJ, U.S.A.)

Growth and characterization of Si–Ge atomic layer superlattices. 17
J.-M. Baribeau, D. J. Lockwood, M. W. C. Dharma-Wardana, N. L. Rowell and J. P. McCaffrey (Ottawa, Ontario, Canada)

Study of hole transport through minibands in symmetrically strained Ge_xSi_{1-x}/Si superlattices 25
J. S. Park, R. P. G. Karunasiri and K. L. Wang (Los Angeles, CA, U.S.A.)

Electronic structure of ultrathin Si_nGe_n strained superlattices: the possibility of direct band gaps 33
S. Froyen, D. M. Wood and A. Zunger (Golden, CO, U.S.A.)

Optical properties of perfect and imperfect Si–Ge superlattices 49
K. B. Wong, R. J. Turton and M. Jaros (Newcastle upon Tyne, U.K.)

Investigation of Si_mGe_n strained monolayer superlattices by RHEED, Raman, and X-ray techniques 57
V. Arbet, S. J. Chang and K. L. Wang (Los Angeles, CA, U.S.A.)

Confined phonons in strained short-period (001) Si/Ge superlattices 65
W. Bacsa, M. Ospelt, J. Henz, H. von Känel and P. Wachter (Zürich, Switzerland)

Calculation of energies and Raman intensities of confined phonons in Si–Ge strained layer superlattices. 71
J. White, G. Fasol, R. A. Ghanbari (Cambridge, U.K.), C. J. Gibbings and C. G. Tuppen (Ipswich, U.K.)

Relaxation of coherent strain in $Si_{1-x}Ge_x$/Si superlattices and alloys 79
R. J. Hauenstein, R. H. Miles (Malibu, CA, U.S.A.), E. T. Croke and T. C. McGill (Pasadena, CA, U.S.A.)

Strain adjustment in ultra thin Si/Ge superlattices 87
E. Kasper, H. Kibbel and H. Presting (Ulm, F.R.G.)

Improvement of structural properties of Si/Ge superlattices 95
K. Eberl, E. Friess, W. Wegscheider, U. Menczigar and G. Abstreiter (Garching, F.R.G.)

Phonons in Si/Ge superlattices: theory and experiment 105
E. A. Montie, G. F. A. van de Walle, D. J. Gravesteijn, A. A. van Gorkum and W. J. O. Teesselink (Eindhoven, The Netherlands)

A photoluminescence study of Si/Ge superlattices 111
E. A. Montie, G. F. A. van de Walle, D. J. Gravesteijn, A. A. van Gorkum, E. C. Cosman, C. W. Fredriksz and C. W. T. Bulle-Lieuwma (Eindhoven, The Netherlands)

SiGe: MICROSTRUCTURE

Strain relaxation phenomena in Ge_xSi_{1-x}/Si strained structures 117
R. Hull, J. C. Bean, D. J. Eaglesham, J. M. Bonar and C. Buescher (Murray Hill, NJ, U.S.A.)

Misfit dislocations in annealed $Si_{1-x}Ge_x$/Si heterostructures 133
C. G. Tuppen and C. J. Gibbings (Ipswich, U.K.)

Heterogeneous nucleation sources in molecular beam epitaxy-grown Ge_xSi_{1-x}/Si strained layer superlattices 141
D. D. Perovic, G. C. Weatherly (Toronto, Ontario, Canada), J.-M. Baribeau and D. C. Houghton (Ottawa, Ontario, Canada)

Reduction of dislocation density of MBE-grown $Si_{1-x}Ge_x$ layers on (100) Si by rapid thermal annealing 157
B. Holländer, S. Mantl, W. Jäger (Jülich, F.R.G.), F. Schäffler and E. Kasper (Ulm, F.R.G.)

Chemical ordering and boundary structure in crystalline Si–Ge superlattices . 165
E. Müller, H.-U. Nissen, M. Ospelt, H. von Känel (Zürich, Switzerland) and P. Stadelmann (Lausanne, Switzerland)

The structural stability of uncapped versus buried $Si_{1-x}Ge_x$ strained layers through high temperature processing. 171
D. C. Houghton, C. J. Gibbings, C. G. Tuppen, M. H. Lyons and M. A. G. Halliwell (Ipswich, U.K.)

Germanium diffusion and strain relaxation in Si/$Si_{1-x}Ge_x$/Si structures . . . 183
G. F. A. van de Walle, L. J. van Ijzendoorn, A. A. van Gorkum, R. A. van den Heuvel, A. M. L. Theunissen and D. J. Gravesteijn (Eindhoven, The Netherlands)

Ge segregation during molecular beam epitaxial growth of $Si_{1-x}Ge_x$/Si layers 191
D. J. Gravesteijn, P. C. Zalm, G. F. A. van de Walle, C. J. Vriezema, A. A. van Gorkum and L. J. van Ijzendoorn (Eindhoven, The Netherlands)

SILICON GROWTH

Hydrogen-terminated silicon substrates for low-temperature molecular beam epitaxy 197
P. J. Grunthaner, F. J. Grunthaner, R. W. Fathauer, T. L. Lin, M. H. Hecht, L. D. Bell, W. J. Kaiser (Pasadena, CA, U.S.A.), F. D. Schowengerdt (Golden, CO, U.S.A.) and J. H. Mazur (Los Angeles, CA, U.S.A.)

The initial stages of growth of silicon on Si(111) by slow positron annihilation low-energy electron diffraction 213
M. Horn von Hoegen, J. Falta and M. Henzler (Hannover, F.R.G.)

Interaction of structure with kinetics in Si(001) homoepitaxy 221
S. Clarke, M. R. Wilby, D. D. Vvedensky (London, U.K.) and T. Kawamura (Yamanashi, Japan)

Surface step structure of a lens-shaped Si(001) vicinal substrate 229
K. Sakamoto, K. Miki and T. Sakamoto (Tsukuba, Japan)

Photoluminescence characterization of molecular beam epitaxial silicon . . . 235
E. C. Lightowlers, V. Higgs, M. J. Gregson, G. Davies (London, U.K.), S. T. Davey, C. J. Gibbings, C. G. Tuppen (Ipswich, U.K.), F. Schäffler and E. Kasper (Ulm, F.R.G.)

Rippled surface topography observed on silicon molecular beam epitaxial and vapour phase epitaxial layers 255
A. J. Pidduck, D. J. Robbins, I. M. Young (Malvern, U.K.) and G. Patel (Coventry, U.K.)

Reflection high energy electron diffraction and scanning tunnelling microscopy study of single-domain growth during silicon molecular beam epitaxy on Si(001) 263
A. J. Hoeven, E. J. van Loenen, D. Dijkkamp, J. M. Lenssinck and J. Dieleman (Eindhoven, The Netherlands)

The 698 meV optical band in MBE silicon 273
N. de Mello, G. Davies, E. C. Lightowlers, V. Higgs (London, U.K.), C. J. Gibbings and C. G. Tuppen (Ipswich, U.K.)

SILICON GROWTH/DOPING

Dopant incorporation kinetics and abrupt profiles during silicon molecular beam epitaxy 281
J.-E. Sundgren, J. Knall, W.-X. Ni, M.-A. Hasan (Linkoping, Sweden), L. C. Markert and J. E. Greene (Urbana, IL, U.S.A.)

The measurement of surface boron on silicon wafers annealed in vacuum and gas ambients 299
D. J. Robbins, A. J. Pidduck, J. L. Glasper, I. M. Young and C. Pickering (Malvern, U.K.)

Low temperature kinetics of Si(100) MBE growth 307
H. Jorke, H. Kibbel, F. Schäffler and H.-J. Herzog (Ulm, F.R.G.)

Influence of substrate orientation on surface segregation process in silicon-MBE 315
K. Nakagawa, M. Miyao and Y. Shiraki (Tokyo, Japan)

Growth and transport properties of Si_mSb_1 superlattices 323
H. Jorke and H. Kibbel (Ulm, F.R.G.)

Electrical characterization and subband structures in antimony δ-doped molecular beam epitaxy-silicon layers 331
H.-M. Li, W.-X. Ni, M. Willander, K.-F. Berggren, B. E. Sernelius and G. V. Hansson (Linkoping, Sweden)

Equipment of a 3-inch silicon molecular beam epitaxial system with scanning tunnelling microscopy 339
R. Butz, H. Wagner and K. Besocke (Jülich, F.R.G.)

A Monte Carlo study of the silicon film growth from molecular beams. 345
L. N. Aleksandrov, A. N. Kogan and N. P. Tikhonova (Novosibirsk, U.S.S.R.)

Electrical properties of gallium- and antimony-doped silicon layers, grown by solid phase epitaxy in a molecular beam epitaxial growth chamber 351
A. Casel, H. Kibbel and F. Schäffler (Ulm, F.R.G.)

Structure of amorphous silicon layers deposited under ultrahigh vacuum at different substrate temperatures. 357
A. F. Vyatkin, L. E. Farber, A. S. Avilov and S. N. Orekhov (Moscow, U.S.S.R.)
